**Javier SOLANA,
EU High Representative for the CFSP,
met the Iranian negotiators in Rome**

Javier SOLANA, EU High Representative for the Common Foreign and Security Policy (CFSP), met the Iranian representatives in Rome to discuss the Iranian nuclear issue.

The High Representative qualified the meeting with Dr Larijani and Dr Jalili as constructive. Mr SOLANA and the Iranian representatives agreed to meet again in November, before Dr El Baradei and himself present their respective reports on the degree of cooperation of Iran on the nuclear file, as agreed by the 5+1+the EU group in New York on September 28.

The High Representative reiterated the double track approach and recalled that measures against Iran will only be lifted when Iran fully complies with the United Nations Security Council resolutions.
