
Report by the Director General

1. This report of the Director General to the Board of Governors and, in parallel, to the United Nations Security Council (Security Council), is on the Islamic Republic of Iran’s (Iran’s) implementation of its nuclear-related commitments under the Joint Comprehensive Plan of Action (JCPOA) in relation to its enrichment-related activities. It provides an update on developments since the Director General’s previous reports.¹

Activities Related to Enrichment

2. In an updated design information questionnaire (DIQ) for the Fuel Enrichment Plant (FEP) at Natanz, dated 17 April 2021 and received by the Agency on 20 April 2021, Iran informed the Agency that it intends to install four more cascades of IR-4 centrifuges at FEP in addition to the two previously indicated.²

3. As a result, according to the updated DIQ, Iran intends to use the following centrifuges to enrich natural UF₆ up to 5% U-235 at FEP:³ a total of 6084 IR-1 centrifuges in 36 cascades, 1044 IR-2m centrifuges in six cascades, 1044 IR-4 centrifuges in six cascades and 174 IR-6 centrifuges in one cascade.

² GOV/INF/2021/24, para. 4.
4. On 21 April 2021, the Agency verified at FEP that: 30 cascades of up to 5060 IR-1 centrifuges;\(^4\) six cascades of up to 1044 IR-2m centrifuges; and two cascades of up to 348 IR-4 centrifuges - to enrich natural UF\(_6\) up to 5% U-235 - were installed, of which a number were being used.

\(^4\) The 5060 IR-1 centrifuges installed in 30 cascades remained in the configurations in the operating units at the time the JCPOA was agreed.
